

With over 50 years of experience and knowledge, PE Pipeline Specialists can offer customers a complete solution from mains to meter for gas applications.

Our product range includes everything from pipes, to tees, to valves and beyond, which you can all see in this document. We want to ensure customers that they will be supplied with the best package possible at a price they can afford.

With products across the board, and our friendly and reliable service, PE Pipeline Specialists is your ideal choice for gas products.

# GAS MAINS TO METER PRODUCTS

This page features descriptions of each of the product images seen on the previous page.

- 1 Hot Tap Weld Tee**  
The Series 213 is a fabricated weld-on tee for steel pipes. It is suitable for use with gas, and can be fabricated to any size.
- 2 Steel 555 Valve**  
Softseal Valve is a double-faced, resilient seat, internal screw, clear bore wedge gate valve. It is designed for the isolation of high pressure natural gas.
- 3 Electro-fusion Fittings**  
Full range of GIS and Kitemarked electro-fusion fittings available for gas application from stock.
- 4 Pecats and Governors**  
7 Bar governors and PECAT adaptors available with purge and pressure points; all batch traceable.
- 5 Meter Kits**  
Meter kits for the installation of gas meters into a meter box, available in both 1<sup>st</sup> and 2<sup>nd</sup> stage kits for variety of meter box types.
- 6 Meter Boxes**  
Gas meter box, compliant to British Standard BS8499:2009 and fire retardant. Various types available to include recessed, surface mounted, multi box and Unibox.
- 7 Under Pressure Tee**  
Multiple band, stainless steel clamped tee for under pressure branch connections on all ferrous pipes, PVC and AC.
- 8 Figure 158 Drilling Valve**  
PUR coated valve for use in making under pressure connections to low, medium and intermediate pressure gas distribution systems.
- 9 Gas Pipe**  
Vital to multiple UK industries, our solid wall yellow & orange pipes are multi-layered and flexible, meeting the highest standards.
- 10 Branch Saddles**  
63mm - 180mm outlet range & understraps for up to 10 Bar gas systems. Also available are flanged branch saddles.
- 11 Gas Gate Valves**  
Designed for the isolation of gas, this Softseal Valve is a double-faced, resilient seat, internal screw, full bore wedge gate valve.
- 12 Certus Valves and Chamber**  
PE ball valve DONKIN CERTUS™ for use in the isolation of gas services to domestic, commercial and industrial premises.
- 13 Governor Entry**  
Connection of polyethylene gas pipe above ground within a governor or meter house installation.
- 14 Figure 60 Ball Valves**  
Versatile in application, the Figure 60 Ball Valve can be used with natural and manufactured gases, air, oil, water and LP steam.
- 15 Gas Housing Kiosk**  
A complete range of housings for industrial and commercial gas meters. Incorporates both ventilation and explosion relief requirements.
- 16 Purge Tee**  
Manufactured with a new formed bend, reduces the number of electrofusion joints for optimum system integrity.
- 17 Puppied Stubs**  
GIS approved puppied stub flanges available from 63mm with NP16 flanged backing ring. Available in both SDR11 and SDR17.6.
- 18 Factory Entry**  
Connects service pipe via a mechanical connection to a 90° steel elbow, enabling gas to be conveyed into a building.
- 19 Fabricated Fittings**  
Gas fabricated GIS approved bends and tees available in SDR's 11 & 17.6.
- 20 Plastic Chambers**  
100% recycled, lightweight and durable one-piece manhole chambers and covers.
- 21 Primofit Range**  
Range of mechanical GIS approved gas fittings including couplers and male/female adaptors.
- 22 Marker Tape**  
This tape warns of any utilities located underground, offering more protection than traditional warning tape.
- 23 Galvanised Fittings**  
Malleable iron pipe fittings, available in sizes from 1/8" to 6" PN25 rated. Crane FS taper threads meet BS EN 10226-2 (ISO 7-1).
- 24 Swivel Top Tee**  
Provides an under pressure installed gas service pipe connection to a metallic gas main which has been drilled and tapped with a parallel BSP thread.
- 25 Meters**  
Domestic and commercial diaphragm meters and meter kits from U6 to U160; smart meters available upon request.
